One American dies every hour of every day from oral cancer. Eva Grayzel came close to being the one in this statistic. The riveting details of Eva's delayed diagnosis stimulate thinking about enhanced patient care and education. Eloquent and engaging, Eva reveals the effects of treatment, driving listeners to take responsibility for early detection. Audiences don't just hear her story, they experience it.

OBJECTIVES:

- Integrate oral cancer screenings with education
- Optimize screening techniques and patient care
- Motivate passion to save lives via early detection

BONUS SPEAKER: Dr Robert Buch

ORAL CANCER AND PATHOLOGY REVIEW

- Review your examination technique
- Recognize common oral lesions
- Know when to refer patients
- Understand biopsy techniques and basic treatment options

Dr. Buch received his Doctor of Dental Surgery degree (DDS), in 1992, from the Medical College of Virginia School of Dentistry, in Richmond, Virginia. After serving 3 years as an active duty dentist in the U.S. Navy, he completed a four year Oral & Maxillofacial Surgical residency, in 1999, at the University of Cincinnati Hospitals, in Cincinnati, Ohio. His passion for surgery, medicine, and knowledge led, Dr. Buch to complete his Medical Degree (MD) at the University of Cincinnati College of Medicine in 2001.
